Gold Treasures

Thousands of years ago people discovered gold in rivers. They learnt to make plates, cups and jewellery from this precious metal. There was a lot of gold in places around the Red Sea. Egypt was one of these places. In ancient times, the Egyptians buried their kings in tombs. They buried jewels and gold objects in the tombs along with their dead kings. The gold mask of *Tutankhamen* is a famous object from Ancient Egypt. It was not until 1922 that people found this mask in King *Tutankhamen*'s tomb. The mask is now in the Gold Room at the Egyptian Museum, in Cairo.

The Inca people lived thousands of years ago in the Andes Mountains of South America. They were very clever people and built cities and roads. They also had a lot of gold which they found in rivers in the mountains. The Inca people made many beautiful things from gold. They made beautiful statues, masks, and jewellery. Today these things are in museums around the world. Some people think there is more Inca gold in the mountains of South America. Some people even think there is a lost city which is full of gold.

There is a place in South Africa called Mapungubwe. A thousand years ago, this place was a city. The people in the city had a lot of gold which they found in a river called Shashe River. In 1933, people found many things on top of a hill in this area. They found gold pots and gold jewellery and also a beautiful gold rhino. The rhino is about 12cm long and 6cm high and is about 800 years old. Today it is in a museum in South Africa. There is also a big model of the rhino in a South African city. This model is not gold. It is painted gold.
